

As an enthusiastic subscriber to XM Satellite Radio in my home and car, I am writing to encourage you to resist the anti-competitive lobbying of the NAB to limit local traffic and weather reports on the satellite signal. I depend on these instant reports and often require them at times when they are not as frequently or specifically broadcast on traditional mediums. I am happy to pay for these premium services from the best provider and I urge you to reject the NAB's petition 04-160.

Thank you,

Eric Schenk
